Lubrication:

- Non-drying, non-hardening food grade grease is applied to all areas, including the particle rings.

For production, install the locks and wipe down the outside of the Guide Locks only; maintain the grease on the mating surfaces and within the rings.

Additional Option:

Guide Locks are also available with dual radii for mounting internally as shown at left. To order, specify the catalog number followed by "-R". Ex. GL200X350-R.

Note: 500°F max operating temperature.

US Patent No. 8,821,144 and others pending.
