

A NEW PRODUCT... RELEASED.

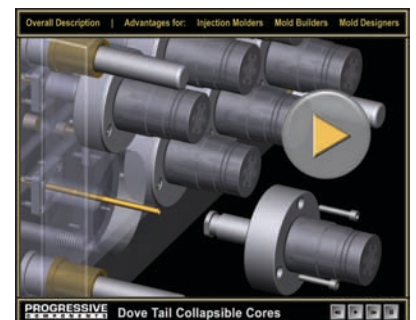

FREEDOM FROM PAST LIMITATIONS

There are many ways to mold plastic parts requiring threads and internal undercuts, but only Progressive's Dove Tail Collapsible Cores can offer these unmatched advantages over past practices:

- Mechanical actuation results in an 'open-shut' tool that is straightforward to build and maintain.
- Elimination of gears and racks reduces mold size, requires a smaller press and dramatically cuts cycle time.
- Exclusive Quick Lock feature allows for servicing in the press, reducing downtime and increasing your cavity utilization percentage.

Don't be locked into designing the same old same mold. Instead, allow your tooling investment to profit to all new heights.
