Progressive Simplifies Year-End Dater Changeovers with More Options & Convenient Online Ordering

Wauconda, IL – Progressive Components, a global supplier of components for the production tooling industry, has further simplified the way molders and moldmakers can access and order the date stamps and replacement date plugs they need by updating its online order form and template.

When it's time for year-end changeovers on tooling, the question is often raised about where the original daters were purchased. Progressive's wide selection of date stamp plugs eliminates that question.

"Rather than having simply one or two styles, we offer a broad range of compatible plugs so that molders can benefit from one stop shopping, and with our exclusive online template, customers can quickly identify styles and sizes easily," says Al Hickok, Midwest Sales Manager. "Plus, the Progressive name and catalog number is etched on the plug for easy identification at the time of the next changeover."

In addition to the compatible plugs, only Progressive offers the RF Series date stamp with raised lettering that result in a smooth molded part surface and no significant variation in wall thickness. The LG Series is ideal for large structural foam molds and blow molds and MicroDaters, which can be installed from the parting line, are ideal when space is limited.

Access Progressive's online order form and template by visiting www.procomps.com/date.

For more information about Progressive's extensive line of date stamps and plugs, email sales@procomps.com or call 800-269-6653 to speak with a customer service representative.

About Progressive Components:

Progressive Components, headquartered near Chicago, Illinois, develops and distributes components for the production tooling industry. Off-the-shelf standards designed to speed mold building and reduce costs and downtime are provided throughout a network of locations including regional hubs in England and Singapore. In addition to direct locations, channel partner representation ranges from India to South Africa, from Italy to Taiwan, and all points in between. Visit www.procomps.com for more information.
